

# SELLING SPHINX

How does Sphinx Logon stand out in the "two-factor authentication" marketplace?

## Easy, feature-rich, works in all verticals.

A couple of customer examples, including the features they use:

| Small Insurance Office (10 users)  | Large Hospital Group (5,000 users)   |
|--|--|
| <p><i>User features used:</i></p> <ul style="list-style-type: none"> <li>* Present card to logon to Windows</li> <li>* Present card to logon to insurance apps</li> </ul> <p><i>Admin features used:</i></p> <ul style="list-style-type: none"> <li>* IT admin manages user passwords centrally</li> </ul> | <p><i>User features used:</i></p> <ul style="list-style-type: none"> <li>* Users self enroll with ID card</li> <li>* Present card to logon to Windows</li> <li>* Present card to logon to hospital apps</li> <li>* Logon with both personal and shared accounts</li> <li>* Logon to PCs and shared kiosks</li> <li>* Pulling card launches custom action to clean data trail</li> </ul> <p><i>Admin features used:</i></p> <ul style="list-style-type: none"> <li>* IT admin manages user passwords centrally</li> <li>* Generation / synchronization of Windows passwords</li> <li>* User groups with different security policies and logons</li> <li>* Multi-site installations from one central server</li> <li>* Multiple admins with different permissions</li> <li>* High availability configuration with failover servers</li> <li>* Full audit trail of authentication activities</li> </ul> |

## High logon security, low cost and effort.
